carbonization furnace

finished carbon

Main furnace

It is composed of greenhouse, furnace body and thermal insulation layer

Carbonization tank

It is a tank body made of high temperature resistant steel plate. In order to facilitate long-distance transportation, it can be packaged as a whole.

Smoke recovery pipe

The smoke generated when the carbonization tank with logs is heated and carbonized in the main furnace is purified through pipes

High temperature resistant head

The pressure resistant, anti-corrosion and high temperature resistant head is used as the sealing cover to further ensure the quality of charcoal.

High Power

All Copper
Wire Winding

The Life Span Can
Reach 10 Years

PRODUCT ADVANTAGES

Selling point quick reference

Environmental
protection

Recycle
combustible gas

Easy to use

Loading and
discharging
convenient

Recycle
wood tar

Safe delivery

Easy
maintenance

Reliable
quality

PRODUCT INFORMATION

GOOD PROCESS

Carbonization furnace is the use of horizontal manufacturing process, carbonization furnace has a three-layer structure, and the middle of light insulation materials, It is possible to keep the temperature in the furnace at all times.

SEALED

The door use packing seal, not into the air, The finished charcoal quality better than the traditional carbonization furnace. Carbonization furnace excess gas can be used to dry the sawdust or to burn the boiler.

ENVIRONMENTAL PROTECTION

The reason is called green carbonization furnace because the stick in the carbonization process will produce a lot of light yellow combustible gas. These gases through the carbonization furnace with there own pipes can make combustible gas diversion to the charring furnace combustion zone to the second fire heating.

More environmentally friendly and saving fuel.

MORE EFFICIENT

Carbonization furnace to end charcoal cooling time is shorter, we design the water cooling , compare with the natural cooling more efficient and convenient.

Environmental air carbonization furnace Supporting a track and kiln car, use more convenient, reduce worker labor intensity.

Technical Details

Model:-Yukti 424. **Fan Power:-** 4kw 5.36hp. **Capacity:-** 4 Ton Per Batch. **Time To Complete One Batch:-** 16~24 Hours. **Fuel Usage:-** 50~100kg Wood Waste Per Hour. **Weight:-** 2700kg. **Dimension:-** 3*1.7M. **Voltage:-** 380v. **Power Type:-** Electric Motor. **Heat Source:-** Wood Waste. **Warranty:-** 1 Year. **Warranty Provider:-** Yuktiraj Pvt Ltd. **Service:-** Online. **Shipping:-** All India Free.

Price:- 2400000 INR + 18% GST
432000 INR Total Payable:-
2832000 INR.

YUKTIRAJ PVT LTD

ISO Certified Indian Company

Yuktiraj Pvt Ltd Is Will Continue With Technical Force, High Quality Product Performance, Reasonable Price, Thoughtful & Efficient Service. Our Company Stresses On The Experience Accumulation And Technology Research. 365 Days Full Support. Honest And Trustable Company. Responsive Staff. We Keep Trust On Quality And Customer Satisfactions. We are India's leading manufacturer and import export company.
