buckle screw

Alloy-steel plate,exquisite
workmanship

Alloy moving knife

The cutting blade is made of high-quality alloy knives, which are tough, wear-resistant, sharp cutting, not easy to rust, corrosion-resistant, and have a longer service life than ordinary steel knives, and can improve the efficiency of the wood material shredder, thereby improving the quality.

Thickened cutter

The cutter head is made of thickened steel plate, which has changed the original fragile characteristics and increased the service life of the machine. The design of the fan blade not only improves the running speed of the wood in the machine, but also facilitates the accelerated screening of the wood from the machine.

High-precision movement

The main part of the machine is processed by dynamic balancing equipment, and the weight error in all directions of the machine is small, which ensures that the machine can run smoothly, reduce noise, improve production efficiency, prolong the service life of the machine, low cost, high output, It is a mature wood processing machinery.

High quality screen

Light weight, good stability, non-slip, beautiful appearance, good filterability. The mesh surface is smooth, corrosion-resistant, high-temperature resistant, and durable.

Applicable Scope
