

Spices Grinder Machine

Model:- Yukti 480

6HP

HD HEAVY-DUTY

1

Anti-Slip Foot Pads

Made of natural rubber material, high abrasion resistance, will not slip on any table top.

2 Cabin Cover

Enlarged handle, easy to use. Aluminum alloy buckles on both sides ensure that the cover does not fall off.

3 Inner Bulge

The bulging design can bounce the raw materials back to the crushing chamber during the crushing process, so as to achieve no dead angle grinding.

4 Timing Switch

The maximum set time is five minutes. The pulverization time can be set according to the raw material and the desired powder fineness.

5 Overload Protector

The overload protector lets you say goodbye to the traditional fuse that needs to be replaced, effectively protects the motor from burning out, and guarantees the service life of the machine.

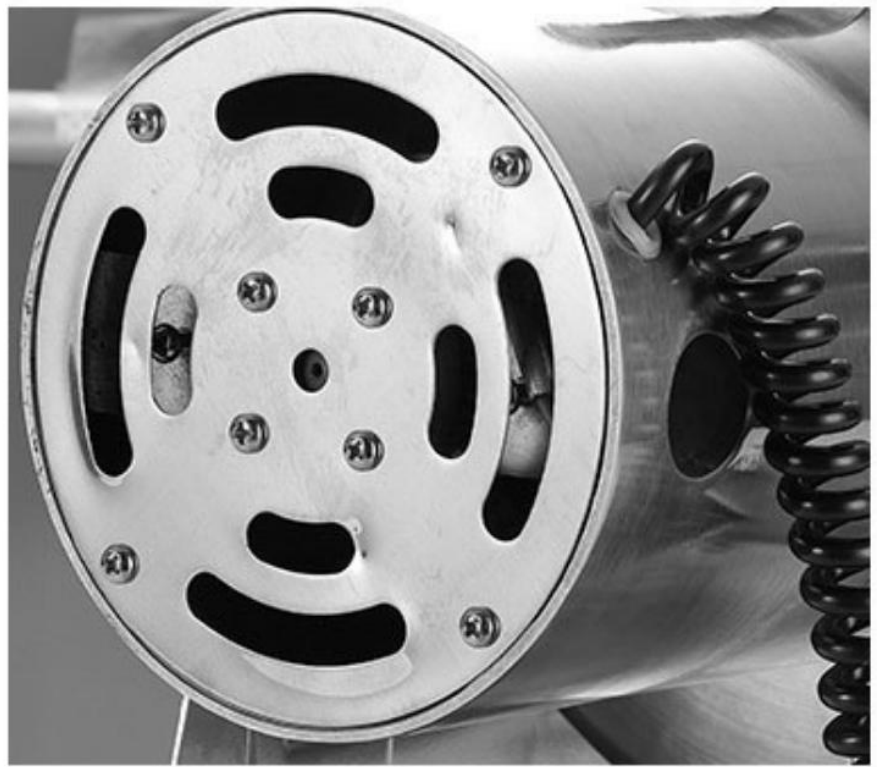

6 Body Fixing Knob

PP material knob, easy to fix and loosen the body. Control the swing and tightness of the machine to facilitate the grinding of raw materials in the crushing bin.

7 Bottom Vent

Motor cooling vents to avoid excessive heat caused by high-speed operation of the motor and improve usability.

8 Side Handle

It is used to dump out the materials in the crushing bin. The side handle enables the machine to be picked up with one hand, which is convenient and labor-saving.

High-Speed Grinder

- Big Capacity
- Stainless steel
- Powerful Motor

Two Blades Fine Grinding

Fineness can reach 50 to 300 mesh

Swing Range 180°

Shaken manually during running
grind more thoroughly without leaving lumps

HOUSEHOLD MULTIFUNCTIONAL GRINDER

Whole Machine
Steel Structure

Durable/Rust Free/Food Grade

Thickened stainless steel

pearl

food additives

Time Switch

The longer you grind, the finer the powder will be

○ large particles

5 s

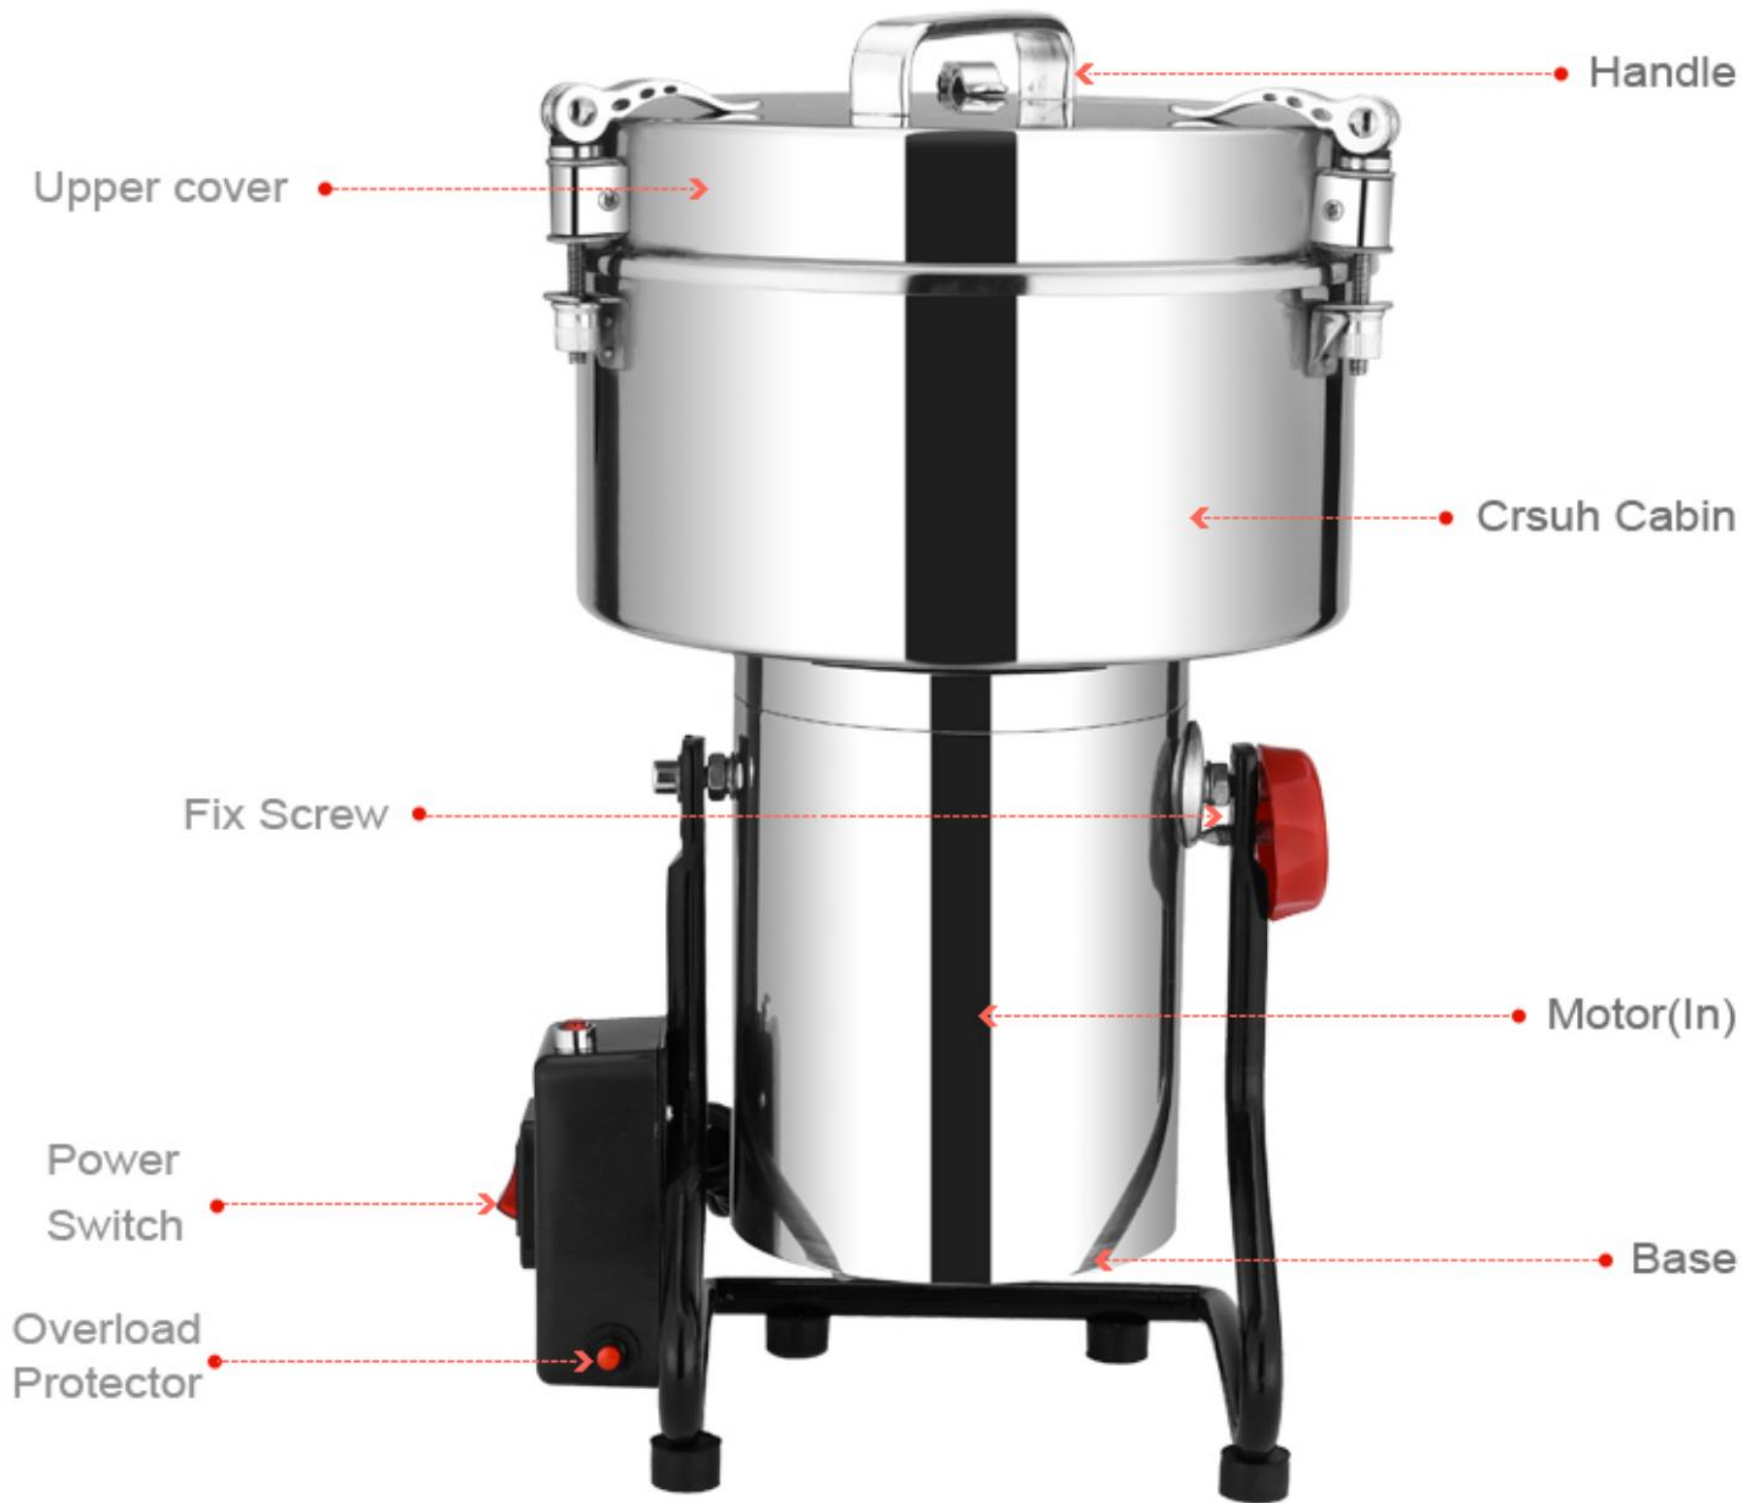

○ small particles

30~60 s

○ powder

1-3 min

Application-Powder Effect

Work 6 Minute Then Rest 8 Minute

The working time is depending on the material.

1. 20s--spice such as chili, pepper

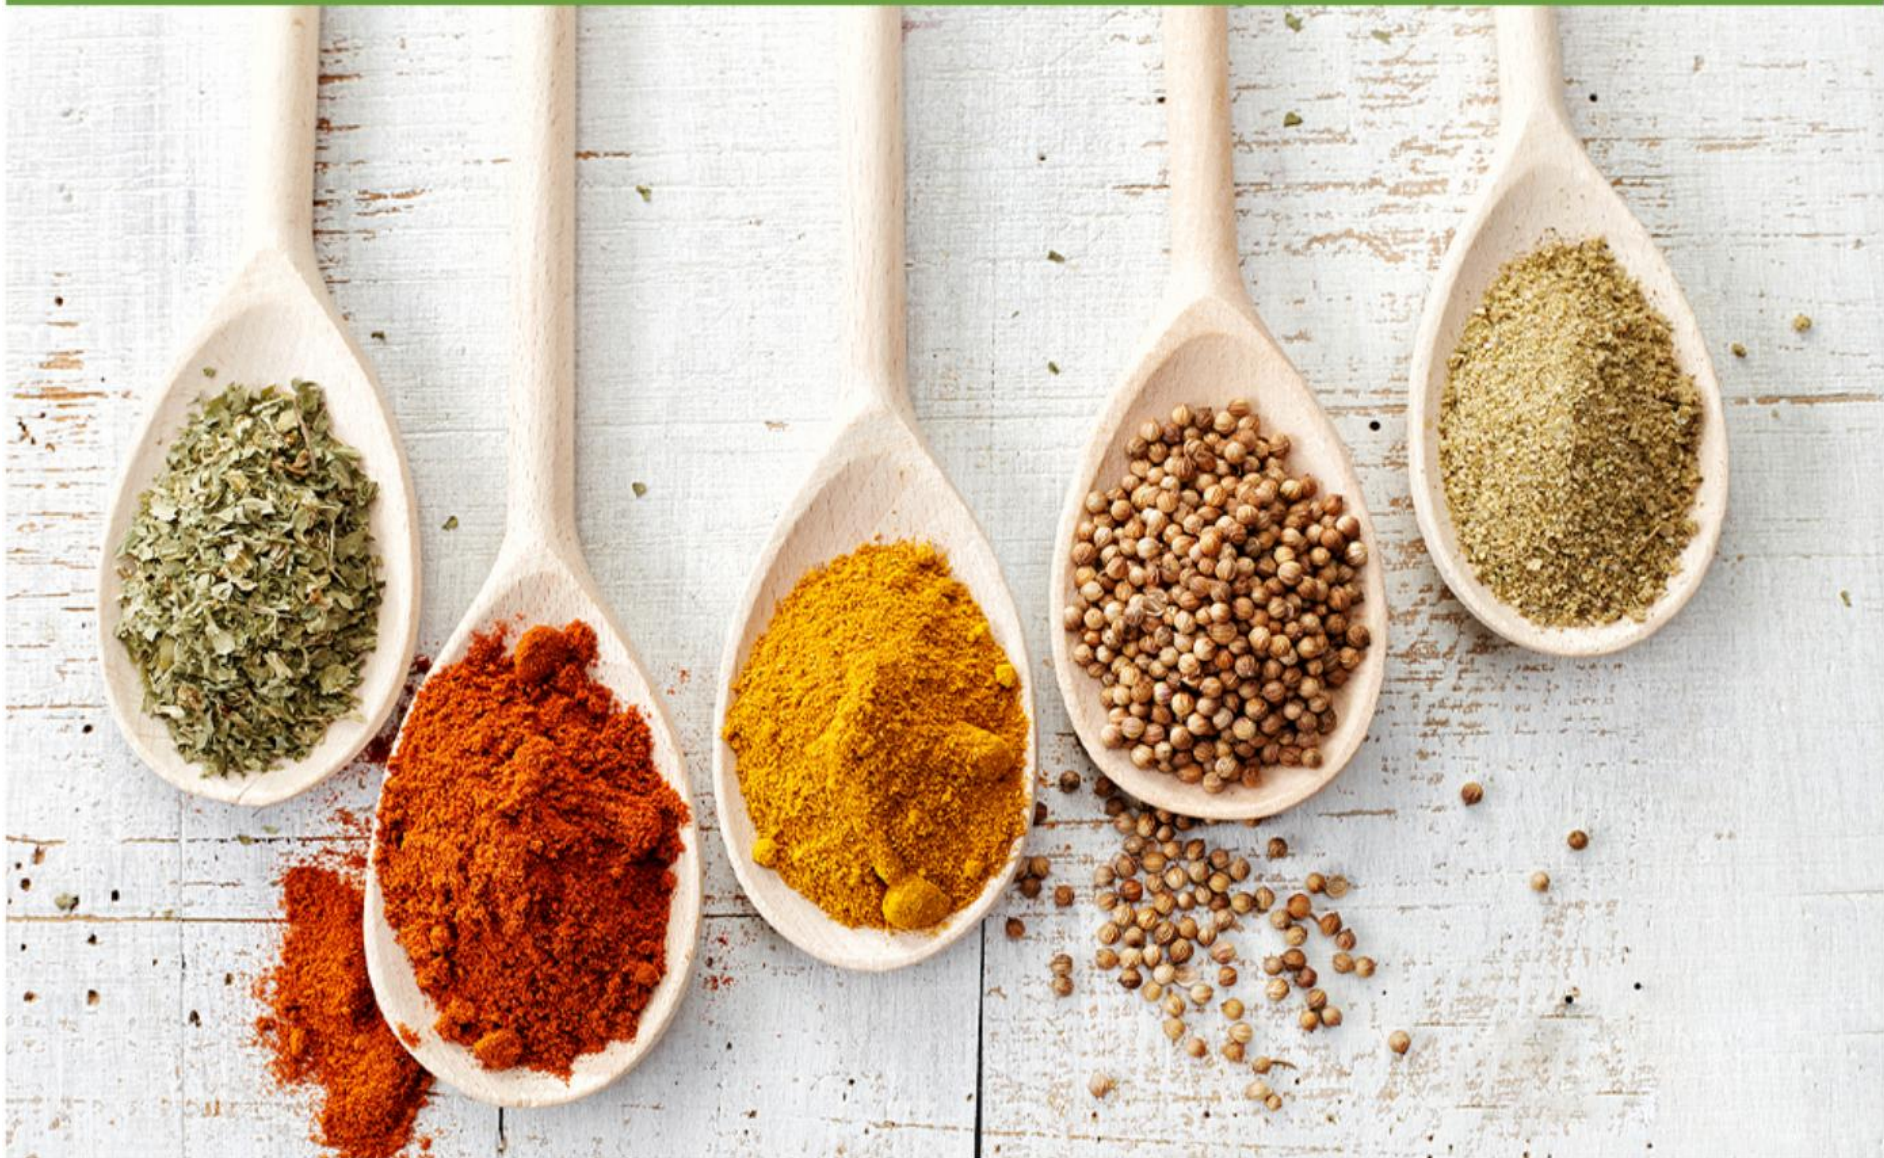

2. 20s-30s--bean, such as soybean, rice, corn niblet.

3. 40s-60s--hard things, such as pearl, roots.

4. about the material with fiber, the fiber cannot be crushed entirely, so there powder will be floccus.

5. about the nuts, and other things with oil. It's better to grind 2-3 seconds, then stop. again, grind 2-3 seconds, then stop. again.... It's to prevent the powder stick to the cabin. Because when the machine working, the speed of the motor is very quickly, and the material will collide with blade and cabin, then it will generate heat. And the material is oily, it will stick to the cabin easily.
